About Me

Detail-oriented and methodical SQA Engineer with over five years of industry expertise in diverse domains, including contact center solutions, e-commerce, telecom, and US-based Healthcare platforms. Adept at designing comprehensive test strategies, executing regression and compatibility tests, and driving defect management using Jira. Proficient in various testing types, such as Functional, Non-functional, and API Testing. Experienced in BDD (Cucumber/Gherkin), Agile-Scrum processes, and CI/CD environments with tools like Playwright, JMeter, and Postman. I possess a strong technical background, Business Analysis acumen, and solid exposure to agile-based work environments.

Work Experience

Sr. SQA Engineer

Expertflow Pvt Ltd, Hybrid

DEC 2021 – PRESENT

Business Domain: Software for Contact Centers

- Designed and executed comprehensive test plans and test cases.
- Conduct software compatibility tests with programs, hardware, operating systems, or network environments.
- Web Automation testing using Playwright, Cucumber JS (along with Visual Code) – mainly in JavaScript.
- Follows the Behavior Driven Development (BDD) approach, utilizing Gherkin syntax (Cucumber).
- Documented the release notes before each QA sign-off for the product release.
- Report software defects, using a bug tracking system, and assign defects to software developers.
- Tested CTI frameworks in CRM's such as Salesforce Lightning, Microsoft Dynamics 365, ServiceNow, HubSpot, ZOHO, Suite, SAP (Hybris, C4C, Sales and Service Cloud).
- Managed bugs using Jira and collaborated with developers to resolve issues.
- Identified test scenarios, estimated test effort, and created test plans and maintained the regression test suite and other testing scenarios. Verification of defects and fixes.
- Supported customers and field teams in diagnosing live environment problems.
- The Agile-Scrum development process is followed for every sprint in each quarter.
